Data Science and Artificial Intelligence Fresher, looking for opportunities where I can contribute my best and fullest.

Work Experience

AI/ML Intern

neeti.ai-Ahmedabad, Gujarat

Internship

October 2025 to January 2026

- Worked on a conversational AI project using OpenAI's ChatGPT models, with FastAPI as the backend, Supabase as the database, and SQLAlchemy as the ORM.
- Developed a Role-Based Access Management (RBAC) system using Django (full-stack) with a PostgreSQL database.
- Worked on a machine learning project focused on reducing Emergency Room (ER) visits by developing predictive models for patient risk assessment.
- Developed an early risk prediction model for preeclampsia in healthcare using XGBoost and other statistical and machine learning models.
