PROFFESIONAL SUMMARY:

Analytical fresher with 1.5 years of experience in GRC data analysis, risk assessment, and compliance reporting within banking and IT sectors. Proficient in Python, SQL, and Unix, with hands-on experience in data processing, statistical analysis, and visualization using Pandas, Power BI, and Matplotlib. Skilled in creating insightful reports and collaborating on security monitoring initiatives. Quick learner with a strong passion for data-driven decision-making and emerging risk management practices.

SKILLS SUMMARY:

Programming Languages: Python, SQL, Unix

Data Analysis Tools: Pandas, NumPy, Matplotlib, Power BI, Microsoft Excel

Statistical Analysis: Hypothesis Testing, Regression Analysis, Time Series Analysis, A/B Testing, Predictive Modeling

Data Visualization: Matplotlib, Power BI, Tableau

TRAINING:

June2023-2024

Focused on upskilling in Data Analysis and Machine Learning to enhance technical capabilities in the areas of risk analytics and compliance. Completed structured training in Python, SQL, statistical analysis, data visualization, and machine learning algorithms, using tools like Pandas, NumPy, Matplotlib, and Scikit-learn. Worked on hands-on projects involving real-world datasets to apply concepts such as regression, classification, and data preprocessing. This training has equipped me to combine my domain experience in GRC with advanced data techniques for more impactful, insight-driven decision-making.

EDUCATION DETAILS:

Degree	University	Year
BTech in Automobile Engineering	JNTU Hyderabad	July 2021
