Profile

Motivated and detail-oriented Java Developer with a solid foundation in Core Java, Spring Boot, Hibernate, REST APIs, and React.js. Skilled in building scalable backend systems and developing responsive user interfaces with HTML, CSS, Bootstrap. Proficient in working with MySQL, H2 databases, and applying OOP principles, MVC, and Microservices architecture. Familiar with Git/GitHub, Maven, JUnit, and Agile methodologies, with hands-on experience through academic projects and self-learning.

Education

Bachelor of Computer Application, *Bundelkhand University*

10/2021 – 06/2024 | Jhansi

- Completed comprehensive degree program with focus in Java-based software development.

Higher Secondary Education, *Hafiz Siddiqui National Girls Inter Collage*

04/2020 – 06/2021 | Jhansi

- Completed a rigorous curriculum in Science (PCM)

Courses

Java Backend Development, *Uncodemy, Noida*

06/2025 – 12/2025 | Noida

- Completed hands-on training in Core Java, OOP concepts, SQL, and Spring Boot.
- Developed RESTful APIs using Spring Boot and Spring Data JPA.
- Implemented CRUD operations with MySQL database.
- Worked on a Hospital Management System project.

Skills

Programming Languages

Java, SQL, HTML, CSS, JavaScript

Framework and Technologies

React.js, Bootstrap, Spring Boot, JPA, JSP, Servlets, Hibernate

Databases

H2 Database, MySQL, MongoDB

Design and Architecture

Object-Oriented Programming (OOPS), Design Patterns, Microservices Architecture, MVC

Professional Experience

Web Developer Intern, *Aryson Technologies*

02/2026 – 04/2026 | Noida

- Built responsive user interfaces using **HTML5, CSS3, JavaScript, and Bootstrap**.
- Converted UI/UX designs into functional web pages.
- Optimized website layout for **mobile and cross-browser compatibility**.
- Developed basic backend functionalities using **Java** and **Spring Boot**, including creating RESTful APIs and handling **server-side** logic.

Projects

Hospital Management System

08/2025 – 09/2025

A system designed to efficiently manage hospital operations

- Developed a Hospital Management System using Spring Boot to manage patients, doctors, Bills and appointments.
- Implemented CRUD operations (Create, Read, Update, Delete) for efficient data management.
- Tested and validated API endpoints using Postman

Hotel Booking Website,

Technologies Used: React.js, JavaScript, HTML5, CSS3

06/2025 – 09/2025

- Developed a responsive Hotel Booking Website using React.js focusing on seamless user interface and smooth navigation.
- Implemented hotel listing pages with search and filter functionality for location, price, and amenities.
- Designed booking form components with state management using React hooks for user-friendly interactions.
- Utilized React Router for navigation between booking, hotel details, and confirmation pages.
