

GURUNATHAN T

Full Stack Developer

+91 6383712019 | guru123tg@gmail.com | Trichy, Tamil Nadu 621012 | github.com/guru123tg-wq/Guru_portfolio

PROFESSIONAL SUMMARY

Motivated and detail-oriented Full Stack Developer with experience in full-stack web development and deployment of production-grade websites. Completed a 3-month internship at Ark Canton Enterprises, where I independently developed and launched two live websites — kilnshelf.org and arkcanton.com. Proficient in HTML5, CSS3, JavaScript, PHP, React.js, MySQL, and Python. Skilled in responsive design, DOM manipulation, on-page SEO optimization, and Git-based version control. Familiar with modern UI frameworks including Bootstrap and Material UI. Passionate about writing clean, scalable, and accessible code, and eager to contribute to a high-performing development team.

PROFESSIONAL EXPERIENCE

Web Developer Intern

Ark Canton Enterprises | On-site | Feb 2026 – May 2026 (3 Months)

- Solely designed, developed, and deployed **kilnshelf.org** — a fully functional B2B commercial website — from initial wireframe to live production using HTML5, CSS3, JavaScript, and PHP.
- Built and launched **arkcanton.com** — the company's corporate website — handling all front-end UI, layout design, and PHP-based dynamic content rendering.
- Developed PHP back-end logic including enquiry/contact forms, server-side validation, and dynamic page rendering for both websites.
- Created fully responsive, mobile-first interfaces ensuring seamless cross-browser compatibility across Chrome, Firefox, Edge, and Safari.
- Implemented on-page SEO strategies: semantic HTML5, meta tags, Open Graph protocol, structured data, and sitemap.xml — boosting organic search visibility.
- Optimised page-load performance via code minification, image compression, and lazy loading, achieving faster Time-to-First-Byte (TTFB).
- Managed entire project lifecycle using Git & GitHub with feature-branch workflows and clean commit history.

Tech Stack: HTML5 | CSS3 | JavaScript | PHP | Git | GitHub | VS Code

PROJECTS

kilnshelf.org — Commercial B2B Website

Role: Sole Frontend & Backend Developer | Tech: HTML5, CSS3, JavaScript, PHP, Git, GitHub

- Delivered a complete, production-ready commercial website for a kiln shelf manufacturing business — from UI/UX design to server deployment.
- Engineered a dynamic product catalogue, enquiry forms with server-side PHP processing, and responsive page layouts for all screen sizes.
- Applied SEO best practices (meta descriptions, Open Graph, sitemap.xml, canonical tags) to improve search engine indexing and visibility.
- Achieved optimised load performance through lazy loading, compressed assets, and minified CSS/JS bundles.

Live URL: kilnshelf.org

arkcanton.com — Corporate Company Website

Role: Sole Frontend Developer | Tech: HTML5, CSS3, JavaScript, PHP, Git, GitHub

- Designed and developed the official corporate website for Ark Canton Enterprises, showcasing company services, team, and contact information.
- Built a fully responsive, pixel-perfect multi-page layout with smooth navigation, animated sections, and a mobile-first approach.
- Integrated PHP contact and enquiry forms with server-side validation and email notification functionality.
- Implemented cross-browser compatibility fixes ensuring consistent rendering across all major browsers.

Live URL: arkcanton.com
