Profile

I am excited to bring my IT expertise to a progressive software firm, where I can contribute my technical skills and analytical abilities. I look forward to growing both personally and professionally in an environment that encourages continuous skill development and innovation. .

Projects

Weather Application github.com

- Developed a responsive weather application using HTML, CSS, and JavaScript integrated with the OpenWeather API to fetch real-time weather data.
- Tools Used: Html , Css, Javascript

Guess The Number github.com

- A simple interactive game where the user tries to guess a randomly generated number.
- Developed using HTML, CSS, and JavaScript to handle design, user input, and game logic.
- Tools Used:Html,Css , Javascript

Presento github.com

- Built as a professional clone of a modern Bootstrap-based template. Developed using HTML5, CSS3, and the Bootstrap framework, it showcases the ability to translate complex UI designs into functional, mobile-first web pages with clean code and a polished aesthetic.
- Tools Used:Html,Css, Bootstrap

Todo Application github.com

- Built a Todo Application using React with CRUD functionality, state management, and a responsive design to manage daily tasks efficiently.
- Todo Management System using React and Redux Toolkit, leveraging RTK Query for efficient API communication and state management.
- Tools Used: HTML, CSS, React, Redux Toolkit

Experience

Ui Intern, CompasNow October 2025 – March 2026

- Worked on responsive UI development, component creation, bug fixing, and frontend optimization.
- Ensured responsive design compatibility across mobile, tablet, and desktop devices.
