PROJECTS

Task Management System (Full-Stack) [↗](#) | Node.js, Express.js, MongoDB, React

Apr 2026

- Designed and developed a full-stack task management system with **JWT-based authentication** and **role-based access control**
- Implemented secure user authentication using **bcrypt** and **JSON Web Tokens (JWT)**
- Built RESTful APIs supporting full **CRUD operations** for managing tasks
- Structured backend using modular architecture with controllers, routes, and middleware
- Integrated React frontend with secured backend APIs using JWT authentication

Kanban Task Management Web Application [↗](#) | HTML, CSS, JavaScript

Dec 2025

- Built a Kanban-style task management application with **To Do, Progress, and Done** workflows
- Implemented **drag-and-drop functionality** using native JavaScript events
- Developed **task creation, deletion, and persistence** using LocalStorage
- Designed a responsive dark-themed UI using CSS Flexbox
- Live Demo: [View Project](#)
- GitHub: [View Repository](#)

Notes Management REST API [↗](#) | Node.js, Express.js, MongoDB

Mar 2026

- Developed a **RESTful backend API** supporting full **CRUD operations** for managing notes
- Designed **modular backend architecture** using Node.js and Express.js
- Integrated **MongoDB with Mongoose** for efficient and scalable data storage
- Built structured **API endpoints** following REST architecture principles
- Implemented secure **environment configuration** using dotenv
