PROFILE

Self-driven MERN Stack Developer with 1+ year of experience in building scalable, high-performance web applications. Skilled in both frontend and backend development, RESTful API integration, and deploying full-stack solutions. Adept at problem-solving, collaborating in agile teams, and delivering production-ready, user-focused applications. Passionate about continuous learning and adopting emerging technologies to create innovative digital solutions.

WORK EXPERIENCE

MediVolt as full stack developer (Sep 2025 – Present)

- At MediVolt, I'm working as a MERN Stack Developer, contributing to the design and development of scalable SaaS-based healthcare solutions. My work focuses on building secure, high-performance web applications and integrating advanced backend workflows.

Bijli wala aaya as full stack developer (July 2025 – Aug 2025)

- Successfully worked on a SaaS project, gaining hands-on experience in full-stack development. Implemented Firebase as the backend, integrated social logins and payment gateways to enhance user authentication and transaction workflows.

Unicorn Tech Mern stack developer 01/05/2025 -10/07/2025

- At Unicorn Tech, I worked as a MERN Stack Developer, where I developed and maintained dynamic web applications using React, Tailwind CSS, Node.js, Express, and MongoDB. I also collaborated on UI/UX design improvements using Figma to ensure seamless and responsive user experiences.

Hind Tech Learning Point (full stack developer) (Oct 2024 – Apr 2025)

- Successfully developed and deployed over 10 full-stack projects using the MERN stack, gaining practical experience in building scalable, responsive, and production-ready web applications.
- Collaborating with cross-functional teams to implement and optimize features. Working on frontend development using React and Tailwind.
- Handling backend APIs, database interactions, and deployment processes. Utilizing Git & GitHub for version control and deploying on Netlify, Render.
