PROJECTS

Hotel Admin Project,

- Hotel Admin Project is a comprehensive application designed to manage and automate all operations of hotel in an efficient and organized way. The system supports essential functionalities such as order management, billing processes, allowing staff to handle daily activities with ease. The application is built to reduce manual work, improve service speed, and enhance overall customer experience. This System ensures smooth coordination between different hotel departments and allows manager to control and oversee all hotel operations online in a reliable and user-friendly manner.

Maza247,

- Maza247 is an engaging online gaming application that offers users a wide range of interactive games and entertainment options. Designed with a focus on seamless user experience, the platform provides smooth gameplay, secure transactions, and real-time interactions. The project aims to deliver a reliable, feature-rich, and accessible gaming environment for users who enjoy playing and exploring various games online.

NewsUpdateexpress,

- NewsUpdateExpress is a dynamic web application designed to provide users with real-time news updates, personalized content recommendations, and a seamless reading experience. Leveraging a modern tech stack and user-centric design principles, the project aimed to deliver a responsive and feature-rich platform for news consumption.
