SUMMARY

Motivated and detail-oriented Web Developer with strong skills in HTML, CSS, JavaScript, and React.js. Specialized in the MERN Stack (MongoDB, Express.js, React.js, and Node.js) for developing responsive and scalable web applications. Experienced in building user-friendly interfaces, writing clean and maintainable code, and developing RESTful APIs. Committed to continuous learning and delivering efficient, high-quality solutions.

EDUCATION

2021 - 2025

M.E.T Engineering College

Bachelor of Engineering in Computer Science and Engineering

April 2023 – October 2023

NCFT Heights Institute

Advanced Diploma in Hardware and Networking Technology

INTERNSHIP

Feb 2025 – April 2025

GREATMINDS TECHNOLOGY

Learned the basics of Python, Java, and JavaScript, along with core programming concepts. Gained hands-on experience in HTML and CSS for building and styling web pages.

Nov 2025 – Mar 2026

ALO EDUCATIONAL HUB

Learned the MERN stack and developed a movie ticket booking application. Worked on both frontend and backend, including UI design and API integration.

SKILLS

- Frontend: React.js
 - Backend: Node.js, Express.js, JWT
 - Databases: MongoDB
 - Dev Tools & Platforms: Git, GitHub, Postman, Vite, VS Code
-

PROJECTS

Movie Ticket Booking Application

- Developed a full-stack Movie Ticket Booking Application using the MERN stack.
- Integrated Clerk authentication to enable secure user login and session handling.
- Built a dynamic and responsive UI with Tailwind CSS, improving user experience.
- Implemented client-side routing using React Router for smooth navigation.
- Designed and developed scalable REST APIs for booking and user management.
- Developed an Admin Dashboard to manage movie listings and monitor users.
- Implemented revenue tracking system to calculate total earnings.
- Ensured efficient database operations using Mongoose ODM
