SUMMARY

UX/UI Designer specializing in user research, dashboard design, interaction design, information architecture, and workflow optimization. Experienced in designing mobile and web interfaces, CRM dashboards, structured navigation systems, and user-centered workflows using Figma, Notion, Miro, and FigJam. Strong focus on usability, accessibility, and data-driven interface design. Seeking an entry-level UX/UI Designer role to create impactful and user-centered digital experiences.

TECHNICAL SKILLS

UX Design: User Research, User Journey Mapping, Task Flows, Information Architecture, Wireframing, Prototyping

UI Design: Dashboard UI Design, Mobile UI Design, Responsive Design, Accessibility Design, Design Systems

Tools: Figma, Notion, Miro, FigJam

Product Thinking: Workflow Optimization, Feature Prioritization, Data-Driven Interface Design

PROJECTS

Heritage Course Discovery Platform – UX Case Study Oct 2025

Designed a research-driven UX platform helping students navigate educational and cultural transition experiences.

Identified key pain points around uncertainty, fragmented guidance, and overwhelming admission workflows through UX research and insight synthesis.

Built structured information architecture, onboarding journeys, and guided user flows for both Indian and international education pathways.

CRM + LMS + HRMS Integration Platform – UX Case Study Feb 2026

Designed an integrated platform connecting CRM, LMS, and HRMS systems for unified student lifecycle management.

Improved operational workflow visibility through centralized dashboards, automation flows, and status tracking.

Created system architecture, task flows, dashboard interfaces, and interactive Figma prototypes for cross-functional coordination.

Enhanced lead management, onboarding, learning engagement, and staff coordination through connected workflow experiences.

EXPERIENCE

UX/UI Designer – Academic & Personal Projects

2026 – Present

Designed UX case studies focused on dashboard systems and heritage education platforms.

Built wireframes, prototypes, and high-fidelity interfaces in Figma.

Developed structured navigation systems using user flows and information architecture.

Conducted usability-focused research and workflow planning for digital product experiences.
